Fundamentals of Non-Abusive Crisis Intervention & Personal Safety

PRESENTED BY THE CANADIAN INSTITUTE FOR CRISIS INTERVENTION
TRAINING (CICIT)

Intended Audience:

Our workshops are intended for participants who are new to the field, or have experience and are wanting to build on their existing knowledge and experience base. This workshop is for teachers, educational assistants, social workers, child and youth care staff, child protection staff, nurses, mental health workers, probation officers, family support workers, career counselors, addictions counselors, foster parents, students in child and youth care, mental health, policing and security programs. This certification is valid for 3 years.

Learning Objectives:

Prevention – This component of the program requires participants to evaluate their own reactions to verbal and physical aggression. In addition, participants will assess their approach to individuals who are aggressive and challenging.

De-escalation – Techniques provide participants with training in verbal and non-verbal intervention for defusing and stabilizing an escalating situation in a non-threatening manner.

De-briefing – Trains participants to process the incident with the individual and teach alternative behaviors. This component includes an outline for de-briefing strategies for clients and staff.

Personal Safety – Participants will learn how to protect themselves in situations where they are at imminent risk of injury. All techniques are meant to maximize safety for the participants and to control, not injure, their assailant.

Physical Interventions (day 2 only) – This includes escorts and control techniques. All techniques allow for maximum control and safety of the individual and the staff performing the intervention.
